When we arrived at the beach, we saw trees growing out of the sea! Most trees can't grow in salt water, but mangrove trees can. They have amazing roots which grow high out of the water. These roots help them get oxygen. When I touched the trees leaves, they felt very thick. These special leaves stop the plants losing water when it's very hot.

Read and listen to the story. In the mangrove tree

في شحرة المنجروف

A kingtisher was visiting her old friend, the lizard, in a mangrove tree. She flew down and sat next to the lizard. "You look sad," said the kingfisher to the lizard. "What's the matter?"

كَنْ مَنْ ١٠١٠ فِ بَرُورَ صَدِيقَتَهُ القديمَةِ، السَّحِلَيَةِ، فِي شَجِرةَ المَنْحُرُوفَ، طَارَ إِلَى أَسَفَلُ وَحَلْسُ بَحَنْبُ لَنَّامِ وَقَالُ طَائِرَ الرَّفْرَافُ لَلسَّحِلِيَةَ "أَنْتِ تَبِدِينُ حَزِينَةً" . وَسَأَلُهَا "مَا الأَمْرِ؟".

"People came and cut down some trees. The trees protected the worms and the fish we eat, but now it's difficult to find food." "Oh no!" said the kinglisher looking worked. "I'm hungay." Suddenly

kingfisher, looking worried. "I'm hungry." Suddenly, a dugong came up out of the sea.

ق المحمد "حاء المس و قطعوا بعض الأشحار. الأشجار تحمى الديدان والأسماك التي بأكلها ، ولكن الاسمال التي بأكلها ، ولكن الاسمال التي بأكلها ، ولكن الاسمال العنور على الطعام." قال طائر الرفراف "أوه لاا" ، وكان ببدو قلقا، "أنا جائع." فحاة ، خرج حيوان الاطوم من البحر.

"Hello Dugong!" said the lizard, surprised. "Hello Lizard. Hello Kingfisher. I have some bad news," said the dugong. "What is it? Are the people back again?" asked the kingfisher. "Yes, they are. Can't you hear them?" replied the dugong.

قالب السحلية بالدهاش "مرحيا، أنها الاطوم!" قال حيوان الأصوم "مرحيا أينها السحلية. مرحيا طاير الرفر في لذي بعض الأخيار السيئة لم سأله طائر الثقاف "ما هي هذه الأحدر؟ هي عاد الناس مرة أخرى؟" قال الأطوم "تعمم ألا يمكنك أن تسمعهم؟" .

The lizard and the kingfisher listened carefully. They heard trucks and people shouting. "Oh no. How many more mangrove trees are they going to cut down?" cried the lizard.

استمعت كلًا من السحلية والرفراف بعناية. سمعوا الشاحنات والناسُ يصرخون. بكت السحنية قائلة "أوه لا كم عدد أشجار المنجروف التي سيقومون بقطعها؟".

Lesson (4)

At that moment, the animals heard a buzzing sound. There were three bees buzzing around the tree. One of the bees flew close to the other animals and said,"The people are not going to cut down more trees.

في ثبك تبعظة ، سمعت الحيوانات صوب طنين. كان هناك ثلاثة تحلات تطنّ حول الشجرة, طارت إحدى اسحلات بالقرب من الحيوانات الأخرى وقالت: "لن نقطع الناس المزيد من الأشجار.

They are going to plant other mangrove trees. They understand that they made a mistake. They have learned that the mangrove trees are important, so they're planting new ones. They brought us here to help the trees grow."

سوف بررعون أشجار المنجروف الأخرى. إنهم يفهمون انهم ارتكبوا حطاً. لقد تعلموا أن أشجار المنجروف مهمة ، لذا فهم يررعون اشجارا جديدة. لقد أحضرونا إلى هذ لمساعدة الأشجار على النمو."

"How will you help the trees grow?" asked the dugong, confused. "We carry pollen from one plant or tree to another and that helps them to make seeds," explained the bee.

سال الاطود في حبرة "كيف سنساعدون الاشجار على النمو؟"، اوضحت النحلة قائله "نحمل حبوب النقاح من نبات أو شجرة إلى أخرى وهذا بساعدهم على صنع البذور".

"So, is life going to get better here?" asked the kingfisher. "Yes, it is," replied the bee, smiling. "Good!" said the lizard and the kingfisher together. "We're hungry!"

سال طاير الرفر ف "إذ، هل سيسير الحدة بشكل أفضل هنا؟". أجابت النحلة منتسمة "نعم، ستكون جيدة!" قال السحلية وطائر الرفراف معا. "نحن جانعان!"

In some ways, humans are similar to plants. Think about our circulatory system. Instead of water, our veins and arteries carry blood around our bodies. Arteries move blood away from our heart. Veins carry blood to it. The nutrients and oxygen that we need are in our blood. But we don't use carbon dioxide like plants do.

Humans need sunlight, too. We can't make our own food, but we get vitamin D from sunlight. This can help protect us from getting sick. Sunlight also makes a lot of people feel happy!

He ran away to play with his brothers and sisters, but his mother looked at the sky and worried. Two weeks later, it was still hot, and the ground was hard. There was no rain, and the plants were brown. Now, Cub had a strange feeling in his stornach: hunger. Can we catch a rabbit to eat?" he asked his mother. "lcan't find any rabbits," she said sadly.

Lesson (7)

It was another long, hot day in the grassland. Cub was with his mother, and he lay in the sunshine. But his mother looked worried because there wasn't rain. She hoped it would rain soon. If it doesn't rain, the grass won't grow. Then they will be hungry. If the grass doesn't grow, the rabbits don't have any food. But it rained and Cub was happy again.

Ecosystem

An ecosystem is all the animals and plants in an area. The ecosystem can be as small as a pond or as big as a forest.

In an ecosystem, living things such as plants and animals interact with non-living things such as water, rocks, and soil. The different species in an ecosystem make a community, and they all need each other to survive.

A healthy heart

Your heart beats over 100,000 times a day! So it's important to keep your heart healthy. When you walk, run, swim, or cycle, you make your heart work harder. If you exercise regularly, your heart works better and you can get the minerals, nutrients, and oxygen you need more easily.

How to stay healthy

Health is very important. I love sports. I play tennis, football, and basketball. I eat healthy food like fruit, vegetables, and rice. I don't eat a lot of chocolate because I know it isn't very healthy. In the evening, I want to relax, so I read a book.

"Hello Grandpa!" said Hady. "Do you have something to show us?" asked Hoda. "I always bring you something, don't !? Look at these," "They don't look like normal shoes, "said Hady. "You're right," Grandpa replied. "Let's go outside. I'll show you what the shoe can do." he said. He showed the children a pair of shoes. Hoda and Hady followed Grandpa out of the house to a hill. They were very excited. They sat down and Grandpa took three pairs of shoes from a bag.

My new bike

Last week my grandpa bought me a new bike. It was a present for my birthday. It has two wheels, pedals and brakes. To make it move I have to push the pedals. It moves with push force. When I want to slow it down or stop it, I use the brakes. To move it faster, I push the pedals quickly. I like riding my new bike very much.

A dart paper airplane

To make a dart paper airplane, take a piece of paper and fold in in half vertically. Crease it. Then open the paper. Fold over the top two corners. After that, turn the paper over. Fold it in half and crease the top of it. Then fold it down again and crease it again. Finally your dart is ready to fly!

In summer they eat daffodils. They also eat the leaves of the acacia trees, which give them food and enough water. So, dorcas gazelles never need to drink. The gazelles eat the acacia seeds and take them to new places. Then more acacia trees grow. So, gazelles are an important part of the ecosystem.

Jubari was very brave. He wanted to go everywhere and play with all the animals. However, Subira taught him which animals were dangerous and how to stay away from pregators. He learned to run away very quickly.

One day, Jubari and Subira were looking for food. Jubari asked his mother, "Morn, what is this place called?"

Subira answered, "This is Wadi el Gemal, son It means "Wadi of the Camels."

"Why do we live in the Wadi of the Camels?" Jubari said. "We are gazelles."

Subira laughed. "It's only a name, son. Many animals live here. Wadiel Gemal is the perfect place for gazelles."

وفي أحد الرئيام كان "جوباري" و "سوبيرا" يبحلان عن الطعام، وسأل حوداري أمه قائلًا: " أميء ماذا يسمي هذا المكان؟" فرنت سوبيرا قائلة: "إنه وادي الجمال با بي، وهلى يعي "وادى به جمال"،

"Why?" Jubari said. "Well." said his mother. "There are special plants here. First, there's our favorite food, the desert daffodil! And there is also the acacia tree. Their leaves give us food and water all year round, so we never need to drink. And the acacia trees need us, too."

"Why do they need us?" Jubari said.

"We eat their seeds and take them to new places. Then more acacia trees grow."

"I understand," said Jubari.

"But is there a place called 'Wadi of the Gazelles'?"

"I don't know," said his mother.

"I am going to look for it," said Jubari.

Jubari the dorcas gazelle was born in Wadi el Gemal in Egypt's Eastern desert.

For the first year of his life, Jubari followed his mother, Subira. She showed him which plants to eat and where to rest on hot days.

ولد غزال الصحراء "جوباري" في وادي الجمال في الصحراء الشرقية بمصر. وفي أول عام من حياته، رافق "جوباري" أمه "سوببرا" وأوضحت له أي النباتات يأكلها وأين يرتاح في الأيام الحارة.

Jubari was very brave. He wanted to go everywhere and play with all the animals. However, Subira taught him which animals were dangerous and how to stay away from predators. He learned to run away very quickly.

كان جوباري شجاعًا جدًا. وأراد أن يذهب إلى كل مكان ويلعب مع جميع الحيوانات. ومع ذلك، علمته سوبيرا أي الحيوانات خطيرة وكيف يبقى بعيدًا عن الحيوانات المفترسة. وتعلم أن يهرب بسرعة حدًا.

One day, Jubari and Subira were looking for food. Jubari asked his mother, "Mom, what is this place called?" Subira answered, "This is Wadi el Gemal, son. It means "Wadi of the Camels."

"Why do we live in the Wadi of the Camels?" Jubari said.

"We are gazelles."

Subira laughed. "It's only a name, son. Many animals live here. Wadi el Gemal is the perfect place for gazelles."

وفي نحد الأيام خان "حوبازي" و "سوبيرا" يبحثان عن الطعام. وسأل حوباري أمه قانلًا: " أمي، ماذا يسمي هذا المكان؟" مردب سونيرا قاتلة: "إنه وأدى الجمال يا بني. وهذب يعني "و دي به جمال".

قال جوباري: "ولم نعيش في وادي الجمال؟ نحن غزلان". ضحكت سوبيرا وقالت "إنه مجرد اسم يا بني. فالعديد من الحيوانات تعيش منا. وادي الجمال مكان مثالي للغزلان"،

"Why do they need us?" Jubari said.

"We eat their seeds and take them to new places. Then more acacia trees grow."

(13 Read the passage then answer the questions.

Nabq is a very big National Park in South Sinai. Along the coast here, there are 4.8 kilometers of mangrove forest, which is the largest in the Red Sea. We went there to learn why mangrove forests are so important for the marine ecosystem. When we arrived at the beach, we saw trees growing out of the sea! Most trees can't grow in salt water, but mangrove trees can. They have amazing roots which grow high out of the water. These roots help them get oxygen. When I touched the trees leaves, they felt very thick. These special leaves stop the plants losing water when it's very hot. We learned that mangrove trees help the environment in many ways. Mangrove trees protect the non-living things and the living things in the marine ecosystem. When there are storms, their deep roots stop the sand washing away. The forests are also a safe home for many animals.

- The mangrove tree is in the (Red Sea Black Sea Mediterranean Sea - China Sea).

I was just about to draw the curtains as well, when I heard a loud cry of help! It seemed to come from the trees at the end of the garden. I looked out, but I saw nothing.
